

19-Years-Old

PHAROAH-P: Longevity in the Genes

There is much we love about 566JE106 PHAROAH-P. Yet our favorite part of his story is not something you'd see in his sire summary or on his pedigree.

Pictured above is Golden Dream Online Abril "EX-94," PHAROAH-P's Great-Grandam. Currently, she is 19-years-old and still milking for her owner and breeder of PHAROAH-P, Nathan Cline.

Born one week before Sept. 9, 2001 when the Twin Towers came tumbling down in New York City, Abril is the oldest cow Golden Dreams Jerseys has ever had. A prolific dam who often had heifer calves, almost half of the Golden Dream herd traces back to Abril. She is ranked in the top living lifetime cow list for the American Jersey Cattle Association with a lifetime production of over 220,000 Milk, 110,000 Fat and 9,000 Protein. Currently on her 15th lactation, Abril continues to go through the parlor every day.

Their second oldest cow on the farm is Gold Dream Kayne Abilene-P "VG-89". She is nine-years-old and PHAROAH-P's maternal grandam. Abilene is Polled, the source of PHAROAH-P's polled genetics.

With this maternal family, PHAROAH-P's +2.9 LIV and +3.4 DPR are no surprise. Polled. Longevity. Super deep cow family. It's all here with PHAROAH-P. Check out his complete sire summary at: <https://ipssires.com/bulls/jersey-sires/details/113/566JE106-GOLDEN-DREAM-AMERICAN-PHAROAH-P>. Semen is ready to ship.
