

## Our Highest GTPI Genomic Sire at +2892 GTPI

He's new to the IPS sire line-up and he debuts as our highest GTPI sire after the April 2020 Sire Summary. 566HO1332 WHY NOT is +2892 GTPI. He is also +2.14 FLC, +1.92 UDC and plus for both Fat and Protein with +.06% Fat and +.02% Protein. We're also excited about his excellent health traits: +1.6 DPR, +7.3 PL, +4.5 LIV and 2.70 SCS.

Sired by Solution, WHY NOT is out of a VG-85 Frazzled. The next three maternal dams are VG or EX.

You can see WHY NOT 's complete information at:
