

Thanks for the Shout-Out!

In the Winter 2020 edition of Polled Place, dairy producer Matt Goers shared some of his Polled sire picks from the December 2019 Sire Summary.

Included on his list is 566HO1321 CATCH ON-RED *PP. Here's what Matt said about this exciting Red Homozygous Polled Genomic sire:

"If you're looking for something new and exciting on the genomic front, then you might want to check out an exciting new Red & White bull available from International Protein Sires. 566HO1321 D&D Prh Catch-On-PP-Red is one of many Lucky-PP-Red sons available, but is unique in the fact he carries a 153 aAa code, as well as being A2A2. Bred by the Minnesota Polled breeder Dennis Gransee, his maternal line traces back through over 40 years of homebred Red & White dams with solid production and type scores as well. His young dam by Piranha-P is already VG-85 and looks very promising. His genomic data indicates he will build commercial type cows with smaller frames, with high and wide rear udders featuring slightly wider teat placement - perfect for the robot too! At 5% calving ease, use him in the heifer pens to build your cows of the future, now!"

Thanks, Matt, for the shout-out on CATCH ON-RED *PP. You can find his complete information at: <https://ipssires.com/bulls/holstein-genomic-sires/details/140/566HO1321-DD-PRH-CATCH-ONRED-PP>. To place an order, contact IPS at contact@ipssires.com or 608-524-8086.
