

REDLIGHT-RED: #1 UDC R&W Genomic Sire

Consistency. It's difficult for a genomic sire to remain consistent within each new sire summary. Yet, 566HO1312 REDLIGHT-RED has been terribly consistent. For the past four sire summaries, he has been either the #1 or #2 UDC R&W Genomic sire. Currently, he is the #1 UDC R&W Genomic sire with +3.07 UDC. With the August 2020 Sire Summary, REDLIGHT-RED is also the #3 Type R&W Genomic Sire with +3.16 Type. Maybe even more unique? REDLIGHT-RED is one of only two genomic R&W or B&W sires that is at least +1.0 DPR and +3.00 Type.

REDLIGHT-RED is a Unstopabull-Red out of a VG-86 Doorman. This is an extremely deep cow family that includes the highly recognizable R&W names of Redrose-Red and Blackrose-Red, perennial show ring winners.
